

J A S P E R D E S K

The much anticipated arrival of Jasper Desk product available in 20-20 Giza Studio and 20-20 CAP Studio is here. In the past Jasper Desk only had the a la Carte library available in Giza. Now we will have several lines not only in 20-20 Giza, but also in 20-20 CAP and fully working with the new 20-20 Worksheet application. We are told that mid March there will be 10 product lines available to download from the new and improved 2020.net web site. All current users should receive an email from 20-20 Technologies announcing the new libraries. The product lines will then be available on the April Monthly distribution DVD. Jasper Desk hopes that this helps everyone spec our products. After this first round of products added, we will be working hard to get the rest of the product lines available by NeoCon.

Here is a list of the product lines that will be available:

- a la Carte
- a la Curve
- Basics III
- Freedom
- Kuebler
- Metallix
- St. Clair
- Heritage II
- Georgian
- Montebello

20-20 Giza Studio is the leading sales & planning tool for furniture professionals not operating in a CAD-based environment. The software combines a user-friendly interface with the industry's most extensive line of manufacturer catalogs and tools to help you take your projects from sales through design with stunning ease and efficiency. 20-20 Giza Studio is designed to do it all. Create appealing client presentations, develop fast, detailed quotes, design complex layouts and generate a comprehensive Bill of Materials – all with a single software platform. The Giza Studio software contains two base applications, 20-20 Giza Designer and 20-20 Worksheet. Giza Designer is the most easy-to-use space planning software in the industry. Worksheet is the most powerful furniture specification software in the industry.

20-20 CAP Studio has been the industry standard for AutoCAD-based space planning for over 25 years. This comprehensive suite can handle the largest projects efficiently to maximize productivity and get the job done. 20-20 CAP Studio is an integrated package of applications that automates the design and specification process. It contains two base applications, 20-20 CAP Designer and 20-20 Worksheet. CAP Designer is an AutoCAD-based design tool. Worksheet is a powerful specification tool used for product pricing, specification and estimating.
